

Protect your Solar Installation with

BIRD[®] BLOCKER

Why protect your solar panels from birds?

It usually gets too warm under the panels for the Birds and the eggs to hatch successfully. Nevertheless, the birds may continue to build their nests, even if you remove the twigs. The natural ventilation of the system will be disturbed by the twigs, with lower yield and even a higher risk of fire hazard as a result.

Damage to the cables and scratches at the back-sheets of the panels can cause faults. And if the birds' noise is bothering you, or you would like to screen off your panels so that it's more difficult for birds to build a nest under them, then BirdBlocker is the solution. Bridgeable height: 95mm.

If the inner rim of your panels has an aluminium profile, then the BirdBlocker can be quickly & easily mounted using the clips provided. The BirdBlocker system is very effective in deterring birds from nesting under the panels.

- easy to attach
- no need to screw, drill or glue
- UV-resistant
- robust and durable
- 100% recyclable
- 10 Year Product Warranty

Technical specifications:

Length: 100cm per piece
Length Needles: 10cm
Bridgeable height: 95mm
Color: Black
Material: Recyclable HDPE
Clips: Material Stainless steel
Packed per Box: 20m + 150 Clips

Test a clip on the solar panel with the **logo side downwards**. It should be so securely fastened that it's nearly impossible to push upwards. If it is possible to slide it upwards, then use a pliers to adjust the clips on the logo side until it is okay. Put 7 clamps **(logo visible)** per black BirdBlocker and at least 2 per small piece that can easily be cut to size.

The installer bears the responsibility not only for the professional installation, but also for the roof and the solar system on which he is mounting. The installation instructions do not release the executing company to clarify in advance the application possibilities and application of our products in connection with the other used materials at the single object. Always follow appropriate safety precautions and use appropriate tools. This installation guide, the photographs and drawings herein are for the purpose of illustrating installation, tools and techniques, not system designs. RoofTech and BirdBlocker accept no responsibility for applicability, installation and correct use. No liability for printing errors. Technical changes subject to modification. © 7/2018 RoofTech GmbH.
